PROBLEM STATEMENT #06 | Campus & Academic Operations

Name : Sindhu K S

SRN : PES1UG24AM433

AIML Sec H

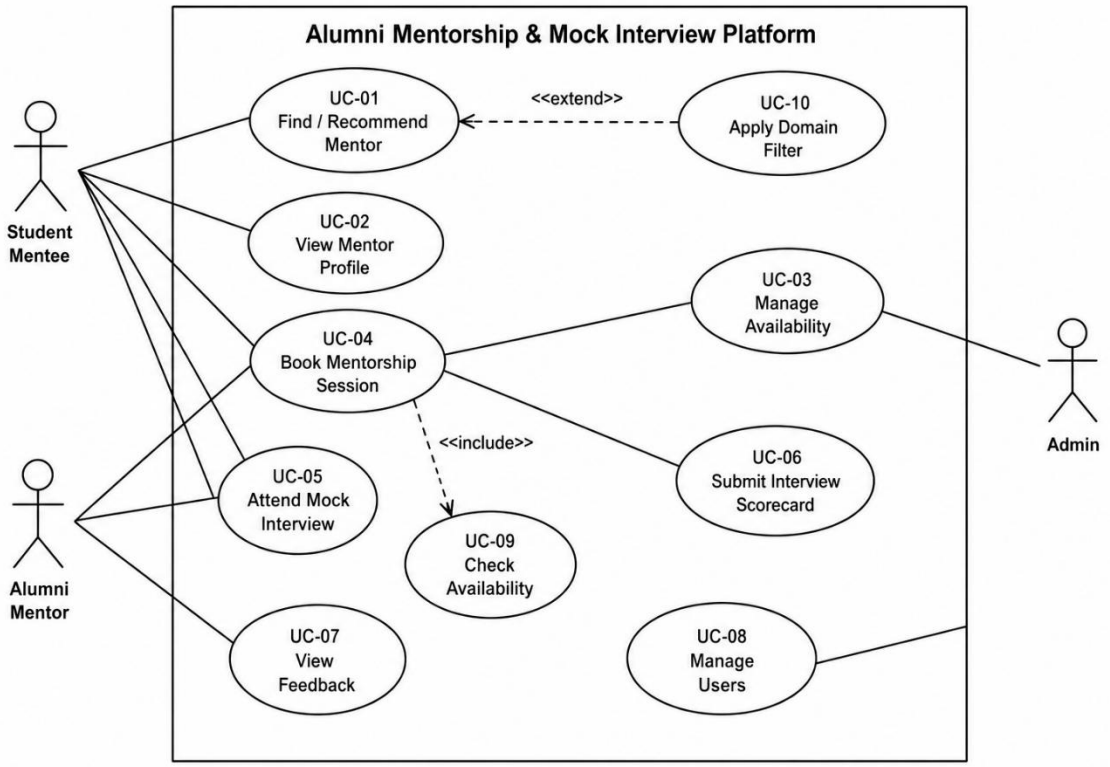

1. **Requirements Table**

Req ID	Type	Description	Priority	Acceptance Criteria	Rationale
FR-001	Functional	The system shall recommend alumni mentors to students based on domain matching and facilitate one-click session booking.	High	Pass: A student selects a domain and receives matching alumni mentor recommendations, and a selected available mentor session can be booked successfully. Fail: No matching mentor is shown or the booking cannot be completed.	Provides the core mentor-matching and booking functionality.
FR-002	Functional	The system shall allow alumni mentors to create, update, and remove their available time slots.	High	**Pass:** A mentor can add, modify, and remove an availability slot, and the changes are saved. **Fail:** Any availability change cannot be saved successfully.	and the changes are saved. **Fail:** Any availability change cannot be saved successfully. Keeps mentor availability accurate for students.
FR-003	Functional	The system shall	High		Enables

		allow students to view available mentor time slots and book a mentorship session.		**Pass:** A student selects an available slot and receives a booking confirmation. **Fail:** The system confirms a booking for a slot that is unavailable.	students to schedule mentorship sessions based on mentor availability.
FR-004	Functional	The system shall allow students and alumni mentors to conduct a scheduled mock interview session.	High	**Pass:** Both the student and mentor can access the scheduled mock interview session. **Fail:** Either participant cannot access the scheduled session.	interview session. **Fail:** Either participant cannot access the scheduled session. Supports the primary mock interview functionality of the platform.
FR-005	Functional	The system shall allow alumni mentors to record and submit a structured scorecard after a mock interview.	Medium	**Pass:** The mentor can enter scores and feedback and successfully submit the scorecard. **Fail:** The scorecard cannot be saved or submitted.	Provides structured post-interview feedback to students.
NFR-001	Non Functional	All user profile data and feedback scorecards shall adhere to privacy guidelines and support soft-deletion within 24 hours of request.	Medium	**Pass:** A deletion request results in soft-deletion within 24 hours, and the data is no longer visible in normal searches. **Fail:** The data remains active after 24 hours.	Protects user profile and feedback data and supports privacy requirements.
NFR-002	Non Functional	The system shall display mentor recommendations	Medium	**Pass:** At least 95% of mentor search requests	Ensures a responsive experience when students

		and available time slots within 3 seconds under normal operating conditions.		display recommendations and availability within 3 seconds during testing. **Fail:** More than 5% of requests take longer than 3 seconds.	search for and book mentors.

3. Use Case Flow Specification

Main Success Scenario:

1. Student Mentee selects the "Find / Recommend Mentor" option. The system displays alumni mentors based on the student's selected domain.
2. Student Mentee selects an alumni mentor from the recommended mentors.
3. System displays the selected mentor's profile and available time slots.
4. Student Mentee selects an available time slot for the mentorship session.
5. System checks the availability of the selected time slot.
6. Student Mentee confirms the mentorship session booking.
7. System records the booking and creates the mentorship session.
8. System adds the session to the relevant calendars and generates a meeting link.
9. A booking confirmation is shown to the Student Mentee.
10. Use case ends successfully.

Alternate Flow

4a. Selected Time Slot Unavailable

● 4a1. System displays a slot unavailable message.

● 4a2. System displays the mentor's currently available time slots.

● 4a3. Student Mentee selects another available time slot.

● 4a4. System checks the availability of the newly selected slot.

● 4a5. If no suitable slot is available, the student can select another mentor and the booking process continues.
